

PRESS RELEASE : 29 July 2011

The Kindest Group presents

Floating Forest

supported by Openvizor, designed by Atmos Studio, produced by Floating House for Hackney Wicked Festival 2011.

The Kindest Group created the **Floating Forest Experience** to offer a unique and relaxing space that fosters attitudes of kindness. Carried across the water on a Ferry Boat, participants arrive on the Tree Island.

Here visitors can consult with the **Floating Forest Oracle** and contemplate their personal futures by using thirtyeight shamanic symbols devised by Lovers Like Us and designed by Vahakn Studio.

Floating Forest is **available for public and private hire** throughout 2011/12 and will appear at Folly for a Flyover, Angel Canal Festival, Camden Lock and other locations yet to be confirmed. www.thekindest.org/floatingforest

Thanks to Openvizor, a forward thinking independent and international arts and culture organisation, projects such as Floating Forest and Hackney Wicked Festival find support. Through these partnerships we are able to build shared spaces of expression, education and organisation across borders, cultures and disciplines.

Atmos Studio brought their unique design vision to the Floating Forest blending art and architecture, crafting beautiful, articulated spaces while merging meaning with sensuality, the digital with the physical, the micro with the global.

Floating House Productions was instrumental in delivering the Floating Forest by creating a powered canoe catamaran vessel for the Ferry Boat, and providing pontoons to support the Tree Island. By bringing the arts onto East London's canals, Floating House encourages a community led regeneration of the waterways.
